SCHOOL STUDENTS, MODERN LANGUAGES, NEW YORK CITY, NEW YORK

THIS REPORT OF FOREIGN LANGUAGE OFFERINGS AND
ENROLLMENTS IN THE PUBLIC SECONDARY SCHOOLS OF THE UNITED
STATES IS FOR THE ACADEMIC YEAR 1963-64. CHARTS AND TABLES
SHOW DETAILED STATE-BY-STATE COMPARISONS BETWEEN THE 1962-63
AND 1963-64 SCHOOL YEARS. COMPARATIVE STATISTICS BACK TO
1958 ARE ALSO SHOWN, BUT NOT BY INDIVIDUAL STATE. GENERAL,
EXPLORATORY, AND AFTER-SCHOOL COURSES WERE NOT INCLUDED IN
THE TABULATIONS. (GC)

**FOREIGN LANGUAGE
OFFERINGS
and
ENROLLMENTS
in
PUBLIC
SECONDARY SCHOOLS**

THE MODERN LANGUAGE ASSOCIATION OF AMERICA

HIGHLIGHTS

1. From the fall of 1958 to the fall of 1963, high-school enrollments (grades 9-12) increased 36.1%, foreign-language enrollments increased 80.9%, and modern-foreign-language enrollments increased 114.6%. (See Chart 1, page 6.)
2. In the fall of 1963, almost 3-1/2 million students in high school were enrolled in foreign-language courses, almost a third of the total high-school population; in 1958 the two million foreign-language enrollment represented only a fourth of the total high-school population for that year. (See Chart 1, page 6.)
3. Enrollments for the fall of 1963 in modern foreign languages equaled 80.3% of the total foreign-language enrollment, or 25.9% of the total high-school population. Spanish and French enrollments combined comprised almost 90% of the total modern-foreign-language enrollment. (See Chart 1, page 6.)
4. Enrollments in all languages except Latin and Ancient Greek were at an all-time peak in the fall of 1963. For the first time in six years, Latin enrollments showed a decrease. In the fall of 1963, Latin enrollments equaled 19.6% of the total foreign-language enrollment; in 1958 they equaled 32.3% of the total foreign-language enrollment. (See Chart 1, page 6.)
5. In fall 1963, a higher percent of foreign-language students continued study into the third year than at any time in the preceding six years. In 1963, 39.1% of modern-foreign-language students continued into the third year, compared to 25.7% in 1958; 17.4% of the Latin students continued into the third year, the same as in 1958. (See Chart 2, page 6.)
6. By fall 1963, 79.4% of the nation's public high schools offered foreign-language instruction as contrasted with 74.9% in 1962 and 61.6% in 1958. (See Chart 3, page 7.)

NUMBER OF SCHOOLS OFFERING FOREIGN LANGUAGES

TABLE XVII. Comparison by State of the Number of Schools which Offered Foreign Languages in Fall 1962 and Fall 1963	42
---	----

INTRODUCTION

This is the sixth in a series of annual reports of foreign-language offerings and enrollments in the public secondary schools of the United States prepared by the Modern Language Association.¹ These surveys have been conducted each year since passage of the National Defense Education Act of 1958 and serve, in part, to measure the impact of that program on the teaching of foreign languages in our public schools; in addition, they are of interest and use to state and local school administrators.

The charts and tables in this report show detailed state-by-state comparisons of offerings and enrollments between the school years of 1962-63 and 1963-64. Comparisons of enrollments from 1958-59 through 1963-64 are also shown, but not state by state. This material and the accompanying text document national trends in secondary-school language enrollments over the past six years.

Enrollments for fall 1963 were solicited from State Supervisors and Foreign-Language Consultants in the various state departments of education by means of questionnaires. (See page 43 for sample Questionnaire A.) In this manner it was possible to receive data from forty-six departments of education. To gather enrollment data for Arizona, Connecticut, Oregon, and Wyoming, it was necessary to send questionnaires (see page 45 for sample Questionnaire B) to the principal of each secondary school in those states. The State Education Department in Albany provided material in raw form from which foreign-language enrollments for New York State were tabulated at the MLA Research Center.

All returns were compared to enrollment data from previous years and any seeming inconsistency was questioned. Particular attention was paid to 7th- and 8th-grade enrollment figures. A problem is posed by the fact that some school systems count the 7th and 8th grades as part of the elementary school, whereas others count them as part of the high school. The distinction is an administrative one and does not imply that language teaching is necessarily

1. Previous reports of public-school foreign-language offerings and enrollments are:

J. Wesley Childers: Foreign-Language Offerings and Enrollments in Public-Secondary Schools, Fall 1958, prepared for the U.S. Office of Education pursuant to contract under the National Defense Education Act.

J. Wesley Childers: Foreign-Language Offerings and Enrollments in Public-Secondary Schools, Fall 1959, prepared for the U.S. Office of Education pursuant to contract under the National Defense Education Act.

J. Wesley Childers: Foreign-Language Offerings and Enrollments in Public-Secondary Schools, Fall 1960, sponsored by the Foreign Language Program of the Modern Language Association.

James N. Eshelman, N.W. Lian: Foreign-Language Offerings and Enrollments in Secondary Schools — Public Schools: Fall 1961, Fall 1962 and Nonpublic Schools: Fall 1962. Research for fall 1961 was sponsored by the Foreign Language Program of the Modern Language Association; research on foreign-language enrollments in public and nonpublic secondary schools, fall 1962 was performed for the U.S. Office of Education pursuant to contract under the National Defense Education Act.

conducted at a more advanced level in the high schools. The classification of 7th and 8th grades differs from district to district, from state to state, and might even be changed by law during the academic year. It was our aim to record only 7th- and 8th-grade enrollments which are part of a secondary school, since the scope of 7th- and 8th-grade enrollments in elementary schools would require a separate survey. Because this problem is complex, we have been persistent in questioning the returns for these grades. Intensive investigation accounts for many of the revisions of previous years' enrollments that will be noted in this report.² Since arbitrary classification alone determined whether 7th- and 8th-grade enrollments were reported, enrollments in grades 7 through 12 cannot be realistically compared between districts that classify the 7th and 8th grades differently. The problem is recognized in the present report by presenting enrollments on three bases: (1) enrollments in secondary-school grades 7 and 8; (2) enrollments in grades 9 through 12; and (3) enrollments in grades 7 through 12 (combining the data of 1 and 2). Enrollments for grades 9 through 12 are based on comparable data since all school systems classify these grades at the secondary-school level. For this reason the data for grade 9 through 12 are more dependable than those for the longer sequence of grades.

In this report the 1962-63 French, German, and Spanish enrollments for Iowa, and the enrollments in all languages for North Dakota and Ohio, are revised figures based on information received after the publication of last year's survey.

Latin enrollments for 1963-64 in the 7th and 8th grades were not available from Alabama. State Supervisors in Illinois and Texas submitted total enrollments for each language taught in their respective states but were unable to indicate enrollments by course level. An estimate of course enrollments within each language in these states was prepared by the MLA, based on the distribution indicated by those states which submitted complete breakdowns. It was also necessary for the MLA to estimate the breakdown of Course I in Pennsylvania for all language students, and in New Mexico for students of German and Latin, into two groups: (1) 7th- and 8th-grade students and (2) 9th- through 12th-grade students. (See Tables II-VIII.)

When referring to the tables that follow, it should be kept in mind that since some students study more than one language at a time, total language enrollment is greater than the number of language students. Also, since only foreign-language enrollments for the year being surveyed were tabulated, a student now in grade 12 who may have studied a language for three years in grades 9 - 11, would be included in the total high-school population but not counted as a language student.

There can be no meaningful comparison of data from one year to the next if the universes of inquiry differ appreciably. The tables in this report show no comparison in cases where the percent of return from a given state differed 10% or more in consecutive years.

2. This report carries revised 1962-63 enrollment figures for the 7th and 8th grades in the following states: Colorado, Connecticut, Florida, Georgia, Illinois, Iowa, Nebraska, North Dakota, Ohio, and Tennessee. Such enrollments for Alabama, Hawaii, Kansas, Louisiana, Massachusetts, Michigan, Mississippi, New Hampshire, New Mexico, North Carolina, Washington, West Virginia, and Wyoming are either incomplete or include elementary-school students as noted in Table XII, but no revised statistics are available.

Special Explanations

"General," "exploratory," and "after-school" courses were not included in the tabulation of enrollments.

A course is considered to be one full year of foreign-language study on the secondary level counted as a unit of credit toward graduation.

Percents have been rounded off to the nearest tenth except where they do not reflect distinctions unless carried to the hundredth or thousandth place.

The following abbreviations have been used in the text, charts, and tables of this report:

FL(s)	foreign language(s), i.e., modern foreign languages <u>plus</u> Latin and Ancient Greek.
HSP	high-school population, i.e., total high-school enrollment regardless of foreign-language enrollment.
MFL(s)	modern foreign language(s)
MLA	Modern Language Association

Acknowledgements

We are grateful for the cooperation of the following language consultants, statisticians, directors and supervisors of secondary education, and assistants, who supplied much of the data concerning public-secondary-school enrollments and offerings included in this report.

Alabama: Joanna Breedlove, MFL Consultant
Alaska: Dana C. Moore, Supervisor, Science and Mathematics
Arizona: Dr. Paul F. Luenow, Jr.
Arkansas: Wilma Jimerson, Supervisor, MFLs; Blanche Laren, Secretary
California: Everett V. O'Rourke, Consultant, Bureau of Secondary Education
Colorado: Dorothy D. Duhon, Consultant, MFLs
Delaware: Annette H. Emgarth, Supervisor, MFLs; Howard E. Row, Assistant Superintendent of Secondary Education; Isabel Riblett, Chairman, Secondary FL Department; Genelle Caldwell, Supervisor, MFLs
District of Columbia: Boise L. Bristor, Statistician
Florida: O. E. Perez, Supervisor, MFLs
Georgia: J. H. Cammon, Consultant in Health and Safety Education
Hawaii: William G. Savard, Assistant Superintendent, Research, Statistics and Data Processing; Marilyn Fankhanel, Research Analyst
Idaho: Marjorie A. Boyd, Supervisor, MFLs
Illinois: Dan Romani, Chief Consultant in FLs
Indiana: Clemens L. Hallman, Director, Division of Science, Mathematics and FLs; Wahneta Mullen, FL Consultant
Iowa: Orrin Nearhoof, FL Consultant
Kansas: Ermal Garinger, Consultant, MFLs
Kentucky: D. C. Anderson, Supervisor, Division of Instructional Services; Katherine Patrick, Secretary; Rita Waits
Louisiana: Inez Estes, Assistant Supervisor, FLs
Maine: Edward F. Booth, State Supervisor, MFLs
Maryland: R. Christine Hogan, Supervisor of Research
Massachusetts: James R. Powers, Senior Supervisor, MFLs; Ernest A. Frechette, Supervisor in Education, MFLs

Michigan: JoAnn Sheahan; Naida Dostal, Supervisor, FLs; Nicholas Georgiady, Assistant Superintendent, Research and Educational Planning; Roger Boline, Consultant, Administrative Services

Minnesota: Ruth J. Kilchenmann, FL Consultant

Mississippi: A. P. Bennett, Director, Division of Instruction

Missouri: William L. Wells, FL Consultant

Montana: William L. Erickson, Coordinator, NDEA Title III; Marilyn Miller, Secretary

Nebraska: Leonard Skov, Administrator of Title III, NDEA

Nevada: Philip D. Smith, Jr., FLs Consultant

New Hampshire: P. Paul Parent, Director, FL Instruction

New Jersey: Paul Hilaire, Consultant, MFLs

New Mexico: Henry W. Pascual, MFLs Specialist; Lena Mares, Secretary, FLs Division

New York: Paul Glaude, Supervisor of FLs Education; Catherine E. LaRosa, Assistant in FLs Education; Emilio L. Guerra, Acting Director, Bureau of FLs

North Carolina: Tora T. Ladu, Supervisor, MFLs

North Dakota: Kiaran L. Dooley, Director of State-Federal Relations

Ohio: Leona Glenn, MFL Supervisor

Oklahoma: Patricia Hammond, Assistant Director of Instruction in Charge of FLs

Oregon: Berton M. Bailey, Consultant on FLs

Pennsylvania: Elizabeth Newton, MFL Specialist, NDEA

Rhode Island: C. E. Sturtevant, Supervisor of Field Studies; Grace M. Glynn, Associate Commissioner of Education

South Carolina: Eugene W. Anderson, State Supervisor of MFLs

South Dakota: William G. Elliott, Deputy Superintendent

Tennessee: Sara W. Whitten, Supervisor, MFLs

Texas: George M. Blanco, Consultant, MFLs

Utah: Elliot C. Howe, Specialist, MFLs; J. Dale Miller, Specialist, MFLs

Vermont: Marianne C. Ciotti, Consultant, MFLs

Virginia: Helen P. Warriner, Supervisor, FLs

Washington: Helen Shelton, Supervisor of FL Programs

West Virginia: George A. Fenley, Jr., Consultant, MFLs

Wisconsin: Frank M. Grittner, Supervisor, MFLs

National enrollments, fall 1958 through fall 1962

Chart 1 shows that the total high-school enrollment increased by more than a third over the last six years. Over the same period of time, enrollments in modern foreign languages more than doubled. In 1958 about one out of six high-school students studied a modern foreign language; by 1963 the ratio was more than one out of every four. With students of the classical languages added to the above, close to one third of the high-school population was enrolled in language study. (See Chart 1 on following page.)

It is interesting to note that over this six-year period Latin has each year made up less and less of the total foreign-language enrollment. In 1958 Latin enrollments were almost a third of all language enrollments; by 1963 they comprised less than a fifth. Although, as indicated above, Latin enrollments have progressively comprised a smaller proportion of the total language enrollment, they have, nevertheless, increased annually from 1958-59 to 1962-63. Only from 1962-63 to 1963-64 did Latin enrollments show a decrease in actual enrollments.

Except in Latin and Ancient Greek, the enrollments in all languages were greater in 1963-64 than at any time in the preceding five years. Enrollments in French, German, Russian, and Spanish increased annually from 1958-59 to 1963-64, and each year the ratio of enrollments in each of these languages to the total high-school enrollment increased.

By 1963 almost half (48%) of the modern-foreign-language enrollment was in Spanish; French enrollments comprised 41%. German, Italian, Russian, and other modern foreign languages made up only 11% of the total modern-foreign-language enrollment.

Chart 4 (page 8) shows, in the form of a graph, increases in high-school population and language enrollments over the past six years. Chart 5 (page 9) shows these increases by individual language.

Chart 2 (page 6) shows that in 1963 a higher percent of students continued language study into the third year than at any time in the preceding six years. This was true for each separate language except Latin, which held its own. There was a higher percent of continuity in Italian, Russian, and other less-studied modern foreign languages than in French, German, and Spanish, which had far greater total enrollments. Detailed data on continuity from 1962-63 to 1963-64 are given state by state in Table XVI on page 40.

Chart 3 (page 7) indicates that each year more schools offered opportunities for foreign-language study. Although the percent of schools that reported was not consistent over the six-year period, the ratio of schools offering foreign-language instruction to the total schools surveyed reflects a trend of increased foreign-language offerings in the high schools. Detailed data on the number of schools offering foreign-language study in 1962-63 and 1963-64 are given in Table XVII on page 42.

FOREIGN-LANGUAGE ENROLLMENTS COMPARED TO HIGH-SCHOOL POPULATION, 1958-1963

CHART 5.
COMPARISON OF FOREIGN-LANGUAGE ENROLLMENTS, 1958-1963

FALL 1963 ENROLLMENTS

Table I. Percents of Response to Fall 1962 and Fall 1963 Surveys, by State. (Page 17.)

It is not always possible to compare figures received from a state in different years because coverage might be more complete in one year than another. For instance, if the enrollments reported for 1962-63 represented a complete tabulation of enrollments in every school in a state, but the enrollments reported for the following year are based on reports from only two thirds of the schools in that state, it is impossible to compare the two sets of figures. Too many variables are involved to warrant estimates based on inflation of the incomplete data. For example, schools in which no foreign languages are taught are less inclined to respond to questionnaires concerning the teaching of foreign languages than those which do offer an opportunity for foreign-language study, thus making it impossible to calculate the ratio of foreign-language enrollments to total high-school enrollments. State departments of education occasionally issue complete statistics on total high-school enrollments, but incomplete statistics on foreign-language enrollments, thus adding to the difficulty of determining such a ratio.

Table I has been prepared to show which enrollments in following tabulations are comparable, and should be used as a reference when consulting all tables of comparison. The percent of response for individual grades or groups of grades, such as 7 and 8 or 9 through 12, was not available. If the bases of calculations used for two sets of figures differ 10% or more, we have arbitrarily classified them as non-comparable.

Tables II-VIII. Individual Language Enrollments by State with Course Breakdowns. (Pages 18-25)

Total language-enrollment figures are those which were actually received from state departments of education, with the exception of those for Arizona, Connecticut, Oregon, and Wyoming. These four states were surveyed by the MLA. All enrollments by course are those actually reported by state departments or tabulated by the MLA, except for French courses in Georgia, all language courses in Illinois and Texas, first-year German and Latin courses in New Mexico, and all first-year languages courses in Pennsylvania and West Virginia. In these instances enrollments by course were estimated on the basis of course distribution in states which supplied complete breakdowns.

Table VIII, which concerns all languages taught in public secondary schools other than French, German, Italian, Russian, Spanish, and Latin, shows, in addition to enrollments with breakdown by course, the percent of students in the second year of a language in 1962-63 who continued into the third year in 1963-64. This information would logically appear in Table XVI, Comparison of 1962 Course II Enrollments with 1963 Course III Enrollments, by State and by Individual Language, but the great variety of offerings found in these "other" languages would make it difficult to incorporate these data into Table XVI.

Tables IX-X. Language Enrollments compared to Total High-School Population, Total Modern-Foreign-Language Enrollment, and Total Foreign-Language Enrollment. (Pages 26-29.)

These tables show the ratio of individual foreign-language enrollments to the total high-school enrollment, the ratio of individual foreign-language enrollments to the enrollment in all modern foreign languages, and the ratio of individual foreign-language enrollments to the total foreign language enrollment.

Tables have been prepared for three groupings of the secondary-school grades, (1) 7th and 8th grades, (2) 9th through 12th grades, and (3) 7th through 12th grades, for reasons given in the Introduction to this report.

Comparisons have been made state by state, and the "total" line shows such comparisons on a national scale. The ratio of language enrollment to high-school population is not given for the District of Columbia, Georgia, Michigan, and Missouri because their foreign-language data were based on partial returns. (See Table I.) It should be remembered that although national ratios are stated, the national totals contain elements that are not individually comparable.

Enrollments in modern foreign languages other than French, German, Italian, Russian, and Spanish have been entered as an aggregate in column 23 on the tables. For a breakdown of these enrollments by specific language, please see Table XV. The few enrollments in Ancient Greek are included in the enrollment figures reported for Latin and the number of such enrollments appears in the footnotes.

Charts 6, 7, and 8 have been prepared from Table X to demonstrate the relationship of the enrollment in each language to the total high-school population of each state, grades 9 through 12 (Chart 6); the relationship of enrollment in each modern foreign language to the total modern foreign language enrollment in each state (Chart 7); and the relationship of the enrollment in each language to the total foreign-language enrollment in each state (Chart 8). The states have been arranged in descending order of enrollment percentage for each language category to indicate the geographic distribution of language study.

These charts indicate that in only five states (Massachusetts, Rhode Island, New Jersey, Connecticut, and New York) did enrollments in foreign languages equal more than half the total high-school enrollment. As might be expected, the highest concentration of French study is found in the New England states and the highest concentration of Spanish study is in the Southwest.

Tables XII-XV. Comparison of Fall 1962 Enrollments to Fall 1963 Enrollments. (Pages 32-39.)

Tables comparing 1962-63 enrollments with 1963-64 enrollments have been prepared for (1) 7th and 8th grades, (2) 9th through 12th grades, and (3) 7th through 12th grades for reasons cited in the Introduction. The percent of change from one year to the next is given state by state for each language and the "total" line shows the national picture. Percents of change are given only when the data for both years are comparable, as shown in Table I. Although percents of change on a national scale are shown, it should be kept in mind that these totals contain components that are not in themselves comparable.

Enrollments in modern foreign languages other than French, German, Italian, Russian, and Spanish have been added together and entered in columns 20 and 21 of Tables XII, XIII, and XIV. No percents of change are given for these aggregate enrollments because such comparisons are meaningful only if given language by language. The percent of change for each individual "other" languages is given in Table XV. Greek enrollments, which are miniscule, have been included in the Latin figures and appear in the footnotes.

State Supervisors who submitted data for 1963-64 that showed unexpected increases or decreases in comparison with data that had been submitted for 1962-63 were queried regarding seeming discrepancies. Information gained from such correspondence is summarized in the following notes, which supplement the footnotes to Tables XII-XV.

- Arkansas - The large percent of decrease in 7th- and 8th-grade French has little significance because of the small numbers involved.
- California - The increases in French, German, and Spanish in the 7th and 8th grades were apparently the result of a state law requiring all 6th-, 7th-, and 8th-grade students to be enrolled in a foreign language by the fall semester of 1965.
- Delaware - The large increase in French and Spanish enrollments in the 7th and 8th grades occurred in schools which offered these subjects for the first time in 1963-64.
- District of Columbia - Increases in language enrollment at the 7th- and 8th-grade level were attributed by the Department of General Research to publicity and the professional effort of those responsible for foreign languages in the schools.
- Idaho - Decreases in language enrollment at the 7th- and 8th-grade level and in Spanish enrollments in the 9th through 12th were attributed to lack of teachers.
- Indiana - The great decrease in total enrollments in the 7th and 8th grades is the result of reorganization which caused some 7th and 8th grades to be classified with elementary schools rather than with secondary schools.
- Kentucky - The increase in language enrollments in the 7th and 8th grades was due to increased emphasis on language study at that level.
- Maine - Fourteen schools with grades 7 and 8 which were formerly classified as elementary were reclassified as secondary by act of the State Legislature. None offered language courses.
- Maryland - German and Latin were available to 7th-grade students for the first time in 1963-64.
- Mississippi - The large increases in French and Spanish were due to increased interest in foreign-language study and the fact that not all Negro enrollments were included in the report for 1962-63.
- Missouri - Data reported by the State Department of Education showed far greater 7th- and 8th-grade Russian enrollment for 1963-64 than was surveyed by the MLA for 1962-63. This is perhaps due to incomplete returns for 1962-63.
- Nevada - Increases at the 7th- and 8th-grade level in German were due to its being taught for the first time in 1963-64 in a number of schools and more teachers being available. Increases in Spanish and French were due to a switch from traditional to audio-lingual methods and materials in over 90% of the schools and interest stimulated by programs in the 7th and 8th grades. French was available to 7th- and 8th-grade students for the first time in a number of schools.
- North Carolina - The 30% increase in total secondary-school enrollment resulted from changing organizational patterns which involved the consolidation of elementary county schools with junior high schools.

Ohio -	Language-enrollment increases at the 7th- and 8th-grade level were due to increased emphasis on beginning language study in the 7th grade, notably in the city schools.
Oklahoma -	French and Latin increases in the 7th and 8th grades were due to the promotion of language study by the Assistant Director of Instruction in Charge of Foreign Languages.
Rhode Island -	The increase in French enrollments at the 7th- and 8th-grade level was apparently due to French being taught for the first time in those grades in a number of schools. Portuguese, presumably, was discontinued at the 7th- and 8th-grade level.
South Carolina -	The increases at the 7th- and 8th-grade level were due to shifting Latin study to the 8th grade to provide for a three-year program in modern foreign languages.
Utah -	French, German, Spanish, and Latin increases at the 7th- and 8th-grade level reflect emphasis placed upon beginning language in those grades. The loss in 9th- through 12th-grade German and Spanish enrollments was due to lack of teachers.

Some unusual increases and decreases from 1962-63 to 1963-64 can also be noted in enrollments for Alaska, Iowa, and Kansas. Explanations for these fluctuations were not available because of staff changes in the respective state departments of education. The decreases in language enrollments from 1962-63 to 1963-64 in Arizona and Connecticut are probably due to different survey methods having been used each year. The MLA obtained 1963-64 enrollments for Arizona and Connecticut by directly contacting each public secondary school in these states rather than through the state departments of education as in 1962-63.

Table XVI. Comparison of 1962 Course II Enrollments with 1963 Course III Enrollments by State and by Individual Language. (Page 40.)

In Table XVI the number of students who were enrolled in second-year language courses in 1962-63 is compared with the number enrolled in third-year language courses in 1963-64. These comparisons are given state by state where comparisons are possible (see Table I), and the "total" line shows the same information on a national basis. It is necessary to refer to Table VIII for continuity data in modern foreign languages other than French, German, Italian, Russian, and Spanish.

National figures show that over a third of the second-year language students continued into the third year. More students of German, Italian, Russian, and various "other" foreign languages continued study into the third year than did students of French and Spanish. Latin had the lowest percent of continuity into the third year. For a comparison of the 1962-63 continuity study with studies of former years, see Chart 2 on page 6.

A total of foreign-language enrollments by course indicates that in 1963-64, Course I enrollments comprised 58.1% of the total foreign-language enrollment; Course II, 30.1%; Course III, 9.1%; Course IV, 2.5%; Course V, 0.2%; and Course VI, 0.02%. (See Chart 9.)

CHART 9. FOREIGN-LANGUAGE ENROLLMENTS BY COURSE, 1963-64

Course I	Course II	Course III	Course IV	Course V	Course VI	Unspeci- fied	Total
2,285,541	1,182,861	357,799	99,151	6,211	867	1,143	3,933,573

Table XVII. Comparison by State of the Number of Schools which Offered Foreign Languages in Fall 1962 and Fall 1963. (Page 42.)

The number of schools in each state that offered foreign-language courses in 1962-63 and in 1963-64 is listed in Table XVII. Whenever possible, a comparison of the two years is made and percents of change are given. (See Table I.)

Data for 1963-64 show that every school in three states (California, Pennsylvania, and Rhode Island) offered foreign-language instruction, but in five (Alabama, Arkansas, Louisiana, Nebraska, and North Dakota), not even half the schools offered foreign-language study. A comparison of the total shows that in 1963-64, 79.4% of the schools in the nation offered foreign languages as contrasted to 74.9% in 1962-63. For a comparison of the number of schools offering foreign languages in 1963-64 with those offering such instruction in previous years, see Chart 3 on page 7.

a. Only the total enrollment reported in Column 11 for this state was supplied by the State Supervisor. The breakdown into course enrollments (Columns 2-9) is an estimate which was made on the basis of the course distribution indicated by those states which supplied us with complete information.

b. The breakdown of Course I into two groups (i.e., 7-8 and 9-12) was not available through the State Supervisor in this state. The breakdown shown in Columns 2 and 3 is an estimate which was made on the basis of the Course I breakdown indicated by those states which supplied us with complete information.

a. Only the total enrollment reported in Column 11 for this state was supplied by the State Supervisor. The breakdown into course enrollments (Columns 2-9) is an estimate which was made on the basis of the course distribution indicated by those states which supplied us with complete information.

b. The breakdown of Course I into two groups (i.e., 7-8 and 9-12) was not available through the State Supervisor in this state. The breakdown shown in Columns 2 and 3 is an estimate which was made on the basis of the Course I breakdown indicated by those states which supplied us with complete information.

a. Latin enrollments for the 7th and 8th grades were not available.

b. Only the total enrollment reported in Column 11 for this state was supplied by the State Supervisor. The breakdown into course enrollments (Columns 2-9) is an estimate which was made on the basis of the course distribution indicated by those states which supplied us with complete information.

c. The breakdown of Course I into two groups (i.e., 7-8 and 9-12) was not available through the State Supervisor. The breakdown shown in Columns 2 and 3 is an estimate which was made on the basis of the Course I breakdown indicated by those states which supplied us with complete information.

d. Only the total enrollment reported in Column 7 was supplied by the State Supervisor. The course enrollments were estimated on the basis of course distribution indicated by those states which supplied us with complete information.

e. Course III enrollments in 1963 exceed Course II enrollments in 1962. This inconsistency results from overly conservative estimates of 1962 Course II enrollments in those states for which 1962 enrollments were estimated, and more complete coverage in other states in 1963.

f. The following enrollments comprise the 181 students in Course II in 1962:
Chinese - 3, Hebrew - 63, Polish - 94, and Swedish - 21.

* Data received for 1963 cannot be compared with data received for 1962. See Table I.

a. See Table XV for breakdown by individual language.

b. Latin enrollments for the 7th and 8th grades were not available.

c. Estimated total high-school enrollment.

d. Only total Course I enrollments were available through the State Supervisor. The grouping into two categories, i.e., 7th-8th grades and 9th through 12th grades, is an estimate based upon the course distribution indicated by states which submitted complete information.

e. Enrollment figure includes 13 students of Ancient Greek.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
 a. See Table XV for breakdown by individual language.
 b. Italian enrollments in Illinois were included in the 2,607 students reported as students of languages other than French, German, Russian, Spanish, and Latin. See Table VIII.
 c. Enrollment figure includes 22 students of Ancient Greek.
 d. Enrollment figure includes 14 students of Ancient Greek.
 e. The breakdown of Course I enrollments into two groups, i.e., 7th and 8th grades and 9th through 12th grades, was not available through the State Supervisor. The grouping into these two categories is an estimate based upon the course distribution indicated by states which submitted complete information.
 f. Enrollment figure includes 21 students of Ancient Greek.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
a. See Table XV for breakdown by individual language.
b. Latin enrollments for the 7th and 8th grades were not available.
c. Estimated total high-school enrollment.
d. Enrollment figure includes 14 students of Ancient Greek.
e. Enrollment figure includes 21 students of Ancient Greek.
f. Enrollment figure includes 13 students of Ancient Greek.
g. Enrollment figure includes 22 students of Ancient Greek.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
^a Enrollments were reported only in 1963.
^b See Table XV for breakdown by individual language and percents of change.
^c Data not available.
^d The breakdown of Course I into two groups (i.e., 7-8 and 9-12) was not available through the State Supervisor. The grouping into these two categories is an estimate based upon the course distribution indicated by states which submitted complete information.
^e Original estimate has been revised.
^f Revised to include secondary school 7th and 8th grade students.
^g Enrollments include students in T.V. language courses for which high school credit is granted. Such enrollments were not included in 1962 report.

- a. Revised to include elementary school 7th and 8th grade students.
 b. Enrollment includes 6th grade students.
 c. Revised.
 d. Data not complete.
 e. Enrollment includes 7th and 8th grade elementary students.
 f. 1961 data.
 g. Estimated.
 h. Revised to include additional 7th and 8th grade secondary school students.
 i. First time offered.
 j. 7th and 8th grade students are included in the enrollment for grades 9-12.
 k. 1960 data.
 l. Enrollment includes 13 students of Ancient Greek.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
- ^a Enrollments were reported only in 1963.
- ^b See Table IV for breakdown by individual language and percent of change.
- ^c The breakdown of Course I enrollments into two groups, i.e., 4th and 9th through 12th grades, was not available through the State Supervisor. The grouping into these two categories is an estimate based upon the course distribution indicated by states which submitted complete information.
- ^d Original estimate has been revised.
- ^e Enrollment includes 15 students of Ancient Greek.
- ^f Data not complete.
- ^g Enrollments include students in T.V. language courses for which high school credit is granted. Such enrollments were not included in 1962 report.
- ^h Enrollment includes 40 students of Ancient Greek.
- ⁱ Enrollment does not include 9th grade students. See entry for Hawaii in Table XII.
- ^j Estimated.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
^a Enrollments were reported only in 1963.
^b See Table XV for breakdown by individual language and percent of change.
^c Data for 7th and 8th grade enrollments not available.
^d Enrollment includes 15 students of Ancient Greek.
^e Revised to include secondary-school 7th and 8th grade students.
^f Data not complete.
^g Enrollments include students in T.V. language courses for which high-school credit is granted. Such enrollments were not included in 1962 report.
^h Revised to exclude elementary-school 7th and 8th grade students.
ⁱ Enrollment includes 49 students of Ancient Greek.
^j Italian enrollments in Illinois were included in the 2607 students who were reported as students of languages other than French, German, Russian, Spanish, and Latin.

- J. Enrollment includes 10 students of Ancient Greek.
 K. Enrollment includes 22 students of Ancient Greek.
 L. Revised.
 M. Data for 7th and 8th grade enrollments not complete.
 N. Enrollment includes elementary-school 7th and 8th grade students.
 O. 1961 data.
 P. Enrollment includes 40 students of Ancient Greek.
 Q. Revised to include additional secondary-school 7th and 8th grade students.
 R. Enrollment includes 14 students of Ancient Greek.
 S. 1960 data.
 T. Enrollment includes 21 students of Ancient Greek.
 U. Enrollment includes 30 students of Ancient Greek.
 V. Enrollment includes 13 students of Ancient Greek.
 W. Enrollments not available for secondary-school 7th and 8th grade students and some 7th grade students.

- * Data received for 1963 cannot be compared with data received for 1962. See Table I.
a. See Table VIII for breakdown by individual language and continuity.
b. Estimated.
c. Enrollments reported for Course III in 1963 are greater than the enrollments reported for Course II in 1962. This inconsistency results from overly conservative estimates of the 1962 enrollment in Course II.
d. Revised.
e. 1961 data.
f. 1960 data.
g. Enrollment includes 10 students of Ancient Greek. Non continued.
h. Enrollment includes 14 students of Ancient Greek. None continued.

THE MODERN LANGUAGE ASSOCIATION OF AMERICA
FOREIGN LANGUAGE PROGRAM

FOREIGN LANGUAGE ENROLLMENTS IN PUBLIC SECONDARY SCHOOLS,
FALL 1963

Name of your state: _____ Your title: _____

Your name and address: _____

TABLE 1. Public secondary schools according to language offerings. Include all secondary schools as follows: 4 year 9-12, senior high 10-12, junior-senior high 7-12, junior high 7-8 or 7-9, or any other combination. If exact figures are not available, give carefully prepared estimates.

Number that offered <u>no</u> FLs	
Number that offered <u>only</u> Latin and/or Greek	
Number that offered <u>only</u> modern FLs	
Number that offered ancient <u>and</u> modern FLs	
Number not reporting	
TOTAL NUMBER OF SCHOOLS	

TABLE 2. Total number of pupils enrolled in the public secondary schools of your state in the fall of 1963. Exclude enrollments in grades 7 and 8 which are administratively organized as part of an elementary system.

Combined Enrollment grades 7 and 8	Combined Enrollment grades 9 -- 12

Note: If coverage is not complete, indicate here the number of schools in your state which are not included in the figures in Table 2.

TABLE 3. Enrollments in Foreign Languages in Fall, 1963.

Note: Course I enrollments are to be broken down into two groups as indicated on the chart. A breakdown is not necessary for Courses II-VI.

	COURSE I		COURSE II	COURSE III	COURSE IV	COURSE V	COURSE VI
	No. of 7th & 8th graders enrolled in Course I	No. of 9th-12th graders enrolled in Course I					
LATIN							
FRENCH							
SPANISH							
RUSSIAN							
ITALIAN							

Enter below any foreign language taught which is not in the above list. Be sure to specify the name of the language.

Name of language	COURSE I (as above)		COURSE II	COURSE III	COURSE IV	COURSE V	COURSE VI

Note: If coverage is not complete, indicate here the number of schools in your state which are not included in the figures in Table 3.

TABLE 4. Indicate the name and address of any school which offers a neglected language, i.e., any language other than Latin, French, Spanish, German, Russian, or Italian.

Name of School	Address	Language(s) Taught

THE MODERN LANGUAGE ASSOCIATION OF AMERICA

FOREIGN LANGUAGE PROGRAM

4 WASHINGTON PLACE • NEW YORK 3, N. Y. • Spring 7-7100

FOREIGN LANGUAGES IN PUBLIC SECONDARY SCHOOLS, FALL 1963

Conducted under Contract with NDEA Title VI Funds for the
UNITED STATES DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE,

Office of Education

I. TO BE ANSWERED BY ALL SCHOOLS RECEIVING THIS FORM:

NOTE: IT IS IMPORTANT THAT WE RECEIVE TOTAL ENROLLMENT FIGURES FROM SCHOOLS WHICH DO NOT TEACH FOREIGN LANGUAGES AS WELL AS FROM THOSE WHICH DO.

1. Name of school: _____
Address of school: _____
(City, State) _____
Your name and title: _____
Date: _____

2. Total number of students in your school at the opening of the fall term in 1963, whether or not they are studying a foreign language.

Combined Enrollment Grades 7 and 8		Combined Enrollment Grades 9-12	
---------------------------------------	--	------------------------------------	--

3. Are the 7th and 8th grades part of your elementary system? Yes ☐ No ☐

II. ADDITIONAL INFORMATION NEEDED FROM SCHOOLS OFFERING FOREIGN LANGUAGE INSTRUCTION:

Enter number of pupils enrolled in each course. A course is defined as a full year of study on the high school level. Course I means Latin I, French I, etc. Enrollment figures for other beginning courses such as general language courses, exploratory courses and after-school courses are not to be included in this report.

NOTE: Course I enrollments are to be broken down into two groups as indicated on the chart. Such a breakdown is not necessary for enrollments in Courses II through VI.

	COURSE I		COURSE II	COURSE III	COURSE IV	COURSE V	COURSE VI
	No. of 7th & 8th graders enrolled in Course I	No. of 9th-12th graders enrolled in Course I					
LATIN							
FRENCH							
SPANISH							
GERMAN							
RUSSIAN							
ITALIAN							

Enter any language not in the above list which is taught in your school in the block below. Be sure to specify the name of the language.

Name of language	COURSE I (as above)		COURSE II	COURSE III	COURSE IV	COURSE V	COURSE VI
